

Secure Swipe

The latest QuikQ tool in the fight against fuel fraud.

Card skimming grew by nearly 500% last year, and it's estimated that fuel theft costs a fleet between **5% to 10%** of its annual consumption. Your fleet can't afford fraudulent transactions, which is why QuikQ is rolling out this easy-to-use program to help you battle fuel theft.

Secure Swipe is an elective program that uses SMS text messaging to confirm your fuel transaction purchases. This ensures you are with your card when a purchase is made and adds an additional layer of protection even if the card is skimmed.

HERE'S HOW IT WORKS

- 1**
Swipe your QuikQ fuel card.
- 2**
QuikQ receives transaction request from merchant.
- 3**
QuikQ sends prompt to POS/pump, and texts you to verify fuel purchase.
- 4**
You respond to text confirming or denying purchase.
- 5**
If confirmed, complete prompt in the POS/pump and fuel up. **If denied**, QuikQ inactivates the card and notifies you and your carrier for further action.

SPECIFIC TEXT RESPONSE INSTRUCTIONS:

- Text **"Y"** or **"Yes"** to confirm you initiated the transaction.
- Text **"N"** or **"No"** to decline the transaction. QuikQ immediately inactivates the card and sends a communication to you and your carrier.
- Text **"Stop"** to opt-out of program. You will not be able to fuel without contacting your carrier to be "excluded" from the program.
- To fuel after opting out, text **"Start"** to **(838) 384-3475** and contact your carrier.
